

Assigning properties

Click on each control in turn and set the following properties:

Label1 Name: lblTitle1 AutoSize: False BackColor: White Text: The Maths Machine TextAlign: MiddleCenter Font: Times New Roman,20	Label2 Name: lblTitle2 AutoSize: False BackColor: White Text: <i>insert name and version</i> TextAlign: MiddleCenter Font: Arial,16,Italic
Button1 Name: btnStart Text: Start Font: Arial,12 BackColor: Blue ForeColor: Yellow	Button2 Name: btnQuit Text: Quit Font: Arial,12 BackColor: Blue ForeColor: Yellow

Note that the background and foreground colours of the buttons have been changed to make them look more interesting. You should also change the colours of each of the labels and the form itself.

There are also some properties of the form that we will change. Make the changes as listed below. Note that it should already be called 'frmTitle'.

frmTitle Text: Blank StartPosition: CenterScreen

Once you have assigned all of the properties for the form, it should look like the one below:
